

ATTENTION 5th GRADE PARENTS

There is a new, MANDATORY vaccine requirement for all children aged 11 years. All students *must* receive a meningococcal (meningitis) and TDaP (tetanus, diphtheria and acellular pertussis) vaccine once they reach their 11th birthday. Please have your doctor provide your *current school nurse* with the dates these vaccines were administered. *Those who do not comply will be excluded from entering Frelinghuysen until documentation is received.* Please be advised that this is a New Jersey state requirement.

**~Thank you for your cooperation~
